

NeuRA Imaging – policy on scanning fees for projects with guaranteed funding for >100 hours of use.

Individual projects using the Ingenia CX scanner at NeuRA Imaging will qualify for a discount if:

- The SMP application for that project indicates that the expected usage of the scanner involves at least 100 hours of scanning.
- Demonstrate at the time that they have guaranteed funding for the nominated number of scans.
- The discount is approved in writing by the SMP and NeuRA executive

The discount is applied to every 20th fully billable scan* and takes the form of an issued invoice for \$0 for that scan.

The following conditions apply:

- Total booking time per scan for each project is determined by examcard and participant planning time.
- The 20th (and 40th, 60th etc) scan will be equal to this booking time per scan.
- Projects are billed at the same scan fee for three years or the duration of the project, whichever is smaller, as per the NeuRA Imaging 2019 Terms and Conditions; projects exceeding this time line are subject to possible fee increases in line with the fees set at that current time. The discount applies to the new fee.

* Fully billable scans are defined as those scans conducted and billed the full cost of the standard scan for that project. Includes “no show” scans but not scans cancelled with some cost penalty.
